cyberBRICS

The **CyberBRICS** project has a triple aim: to map existing regulations; to identify best practices and develop policy suggestions in the areas of **cybersecurity governance** (including personal data regulation), Internet access policy and strategies for the digitalisation of public administrations in the **BRICS** (Brazil, Russia, India, China and South Africa).

The project is hosted by Fundação Getúlio Vargas (FGV) Law School and developed in partnership with the Higher School of Economics, in Moscow, Russia; the Centre for Internet and Society, New Delhi, India; the Fudan University, Shanghai, and the Hong Kong University, China; and the University of Cape Town, Cape Town, South Africa.
